# Pressure transmitters

## NSK and XSK

Pressure transmitters type NSK and XSK are compact, lightweight sensors with piezo resistive sensors to be used by OEM's in refrigeration and air conditioning units for high and low pressure protection, fan control, and diagnostic and performance monitoring purposes.

NSK has a ratiometric output signal, 0.5 to 4.5 Vdc @ 5 Vdc supply.

XSK has a current output signal, 4 to 20 mA.
