Vectis iX-KB

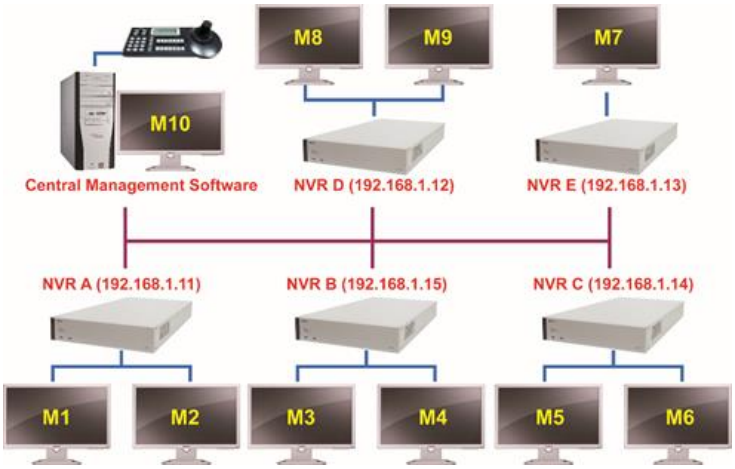
Powerful Desktop Keyboard for Multi-site IP Surveillance - DATASHEET

In a network with a larger group of NVRs and CMS, it often takes much more effort and time to locate a certain camera. The **Vectis iX-KB** keyboard is designed to fix this inconvenience. **Vectis iX-KB** is a full-functional keyboard to dominate the entire network at the comfort on just one site. The keyboard features 35 function keys to quickly select a camera or a monitor in your network to manipulate instant video and recorded video. Also featured is a 3-axis joystick to move a selected camera's lens to quickly frame your desired scene onscreen for PTZ.

The keyboard comes with a dedicated utility to manage the keyboard's features. Use the utility to bring a camera, a monitor or a relevant viewer under the keyboard's control. The utility also includes an onscreen keyboard to interact with you once a physical keyboard is not available.

Features

- Easy installation with plug-and-play USB interface
- Easy operation with function keys and joystick
- Function keys and numeric keys to quickly select a monitor or a camera
- Function keys to manipulate video
- 3-axis joystick to freely move a selected PTZ camera
- Easy management with dedicated utility
- Onscreen keyboard to act like a physical keyboard



Utility Basics

The utility's basics to work, taking monitor management for example, is to make a list of the monitors and register them according to the IP address of a monitor's relevant NVR and the sequence order of a monitor to its relevant NVR.
